

27.01May.CT-SeleniumTestNG

1 May 2023 07:12 PM

IaaS (EC2, EBS, VPC)

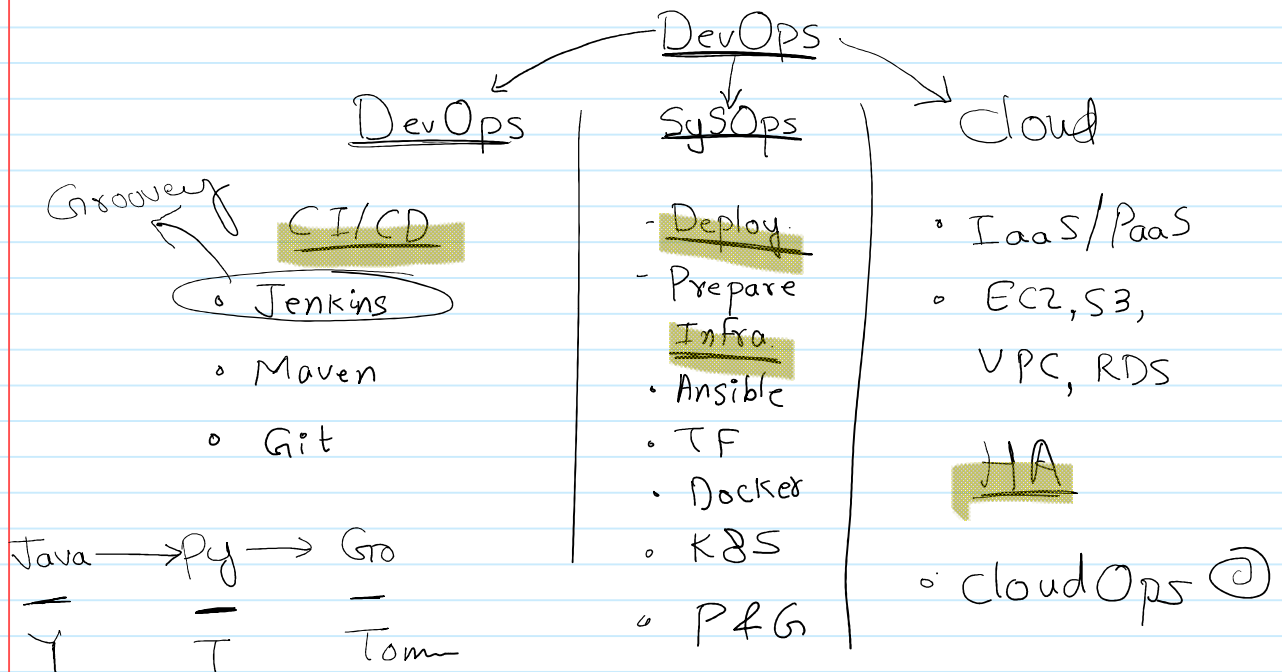

PaaS (S3, RDS)

Basic

Adv - (Lambda, DynamoDB

SQS, SNS, EKS, ECS)

CloudOps (CCommit, CPL, CB, CD)

- ✓ Training (Python)
- ✓ Container/Orchest
- ✓ MicroService → SaaS Archit

- X Testing
- X No Code
- X Virtualization
- X On Prem (H/W)

Continues Testing

Testing Web Application using Selenium

Web Application

- Develop web application using Software engineer
- Run --> Test --> Selenium --> Execute

Tester using Selenium

- Run Application (<https://github.com/login>)
- Browser open silently
- On the address Bar
- Login to Github Account
 - UserName
 - Password
 - Click on **Login** Button
- Read all(Public/Private) Repository

github-login

Trying out selenium in java with [ChromeDriver]

(<https://chromedriver.storage.googleapis.com/index.html>) (download the right version for your laptop)

git clone <https://github.com/NubeEra-MCO/Mvn-Selenium-GithubLogin-AllRepo.git>

cd Mvn-Selenium-GithubLogin-AllRepo

mvn clean

mvn compile

```
# cd target\classes
# java gh.login.App
Enter Your Login: mujahed85
Enter Your password: *****
```

CT

Jenkins = Git --> Maven --> Generated --> Email --> TF/Ansible

Installing Jenkins

1. Take Control and Update Repo.

```
$ sudo su -
```

```
# apt update
```

2. Download Key file

```
# curl -fsSL https://pkg.jenkins.io/debian-stable/jenkins.io-2023.key | sudo tee \
/usr/share/keyrings/jenkins-keyring.asc > /dev/null
```

3. Added key file to jenkins.list file

```
# echo deb [signed-by=/usr/share/keyrings/jenkins-keyring.asc] \
https://pkg.jenkins.io/debian-stable/binary/ | sudo tee \
/etc/apt/sources.list.d/jenkins.list > /dev/null
```

```
# sudo apt update
```

```
# sudo apt install jenkins
```

```
# systemctl status jenkins
```

```
# ufw allow 8080 # Allow Port number of jenkins(ie 8080)
```

```
# systemctl start jenkins
```

```
# cat /var/lib/jenkins/secrets/initialAdminPassword
djfkasdhfkju32d83d2oi3d2oi
```

Open Browser:

<http://localhost:8080>

1. Paste First Generated Password
2. Install plugin as suggested
3. Create Admin user(Username, Password)
4. Start Jenkins

Resetting Jenkins Password:

1. Open this file:

```
/var/lib/jenkins/config.xml
```

```
Edit: useSecurity=false
```

2. Restart jenkins(`systemctl restart jenkins`)
3. Access anonymously
4. Recreate user
